

**Unscripted speech:**  
I can have a fluent conversation about what we are learning about but without having to read from the script or even write a script.

**Substituting and adding:**  
I can improvise in paragraphs and add my own ideas in taking away certain words and adding others in. I can also make up my own sentences which make sense.

# KEY SKILLS.

**Simple creative writing:**  
I can make simple sentences with enough detail in to explain everything. They're detailed really well so everyone understands but also clear enough so everyone can recognize what's being talked about.

**Listening for subtleties:**  
I can listen for the things that aren't as clearly stated from either a tape or the board, I can read through a passage and find out a specific answer to the question and pick out the information that isn't blatant.
